This is the season for good Hus-  
 bands to lop and prune superfluous  
 branches from Fruit-trees, unco-  
 ver their Roots, set all kind of  
 Quick-sets and Fruit-trees in the  
 New of the Moon. Be sure the  
 Wind be not North nor East; and  
 set the same sider to the South and  
 West, which grew at the first. Set  
 Beans, Pease and Parsnips. The  
 weather mild & Moon decreasing,  
 dig Gardens, drench weak and sick  
 Cattle, Kine with Verjuice, Horses  
 with Water and Ground Malt,  
 fodder with a little Bran.

In this Month let not Blood,  
 nor use Physick, unless necessity  
 constrain thee. Beware of taking  
 cold, for Rheums and Plegm do  
 much increase this Month. It's  
 hurtful to fast long, to drink  
 White Wine fasting is good. Use  
 Meats that are moderately hot, for  
 the best Physick is warm Diet,  
 warm Cloaths, and a merry ho-  
 nest Wife.

Now regarding the Wind and Weather, graft, cut Quicksets, cover the Roots of Fruit-trees (opened in *December* and *January*, with fat Earth; sow Oats, Barley, Parsnips, Onions, Carrots, Melons, Cucumbers, and all kind of Pot-herbs; slip Artichokes and Sage, and sow all manner of Garden-seeds.

Now advise with the honest and able Astrological Physician. It is good to purge and let blood, for in this month the humours and blood increase, and gross feeding breeds gross blood and humours; therefore use meats of good digestion, and such as afford good juice and nutriment to the body. Forbear all things salt, purge the blood by potions and blood-letting. Sweet meats and drinks are commendable. Be sure to eat in the morning before you drink.

## Description of the Four Quarter of the YEAR.

**T**He *Spring Quarter* begins this Year *March 10.* about 7 in the morning, and somewhat more, at which time the *Sun* enters the *Equinoctial Sign Aries*, causing an equality of Day and Night all over the habitable World. *Summer* takes its beginning *Jun. 11.* 45 min. past 9 in the Morning, the *Sun* then approaches nearest to our *Zenith*, and enters the first Scruple of the *Tropical Sign Cancer*, making longest Days with us, and shortest Nights. *Autumn*, or *Harvest Quarter*, commences *Sept. 13.* at 25 min. past 1 in the morning, the *Sun* then (to appearance) touches the other *Equinoctial Sign Libra*, and again doth equalize both Day and Night. *Winter* begins *Decemb. 11.* near 2 in the afternoon this year, and then the *Sun* touches the first point of the *Tropical Sign Capricorn*, making with us the shortest Day and the longest Night in the Year; but to those who are our *Antipodes*, the contrary.

## Of the ECLIPSES

This present YEAR 1691.

**T**Here will be only two *Eclipses* this Year, and both of the *Sun*. The first will happen *Febr. 18.* about 1 in the morning; it will be a great *Eclipse* in it self, but too invisible, in regard the *Sun* at that time will not be risen, or seen in our *Horizon*. The second will be on *August 19.* near 6 at night; and though the *Sun* be not then set, it will rarely be visible to us in any part of *England*, in regard of the *Parallax* of the *Moon*, as you may read more at large in other *Calend. & Ephemer.* for this present Year.
